

# Zafety Lug Lock™

Prevent wheel loss on trucks, busses, and military equipment by securing your lug nuts together with the **Zafety Lug Lock™**! The **Zafety Lug Lock™** makes your fleet safer because they create resistance between two nuts to minimize their ability to rotate

**Zafety Lug Locks** are flexible and simple to install as they fit easily over two adjacent nuts. They have been laboratory tested in severe vibration conditions from -40°C to +50°C (-40°F to +122°F), and field tested during high and low rotation.

#### Benefits:

- Zafety Lug Locks do NOT need to be removed for regular maintenance and torque checks!
- Provides a clear visual check
- Reduces risk of wheel loss resulting in personal injury, loss of life or property damage
- Reduces number of costly towing and road call fees
- Economical to outfit commercial vehicles
- Available in custom colours and they are **reusable!**
